Richmond VA (October 14, 2009): National Medical Logistics of Richmond, VA has been selected by Rush University Medical Center (RUMC), Chicago, IL, supply chain

management team to provide operational planning and implementation support services for RUMC's Transformation Initiative. As part of RUMC's Transformation Initiative, NML will provide reengineering recommendations for key processes, space optimization support and implementation planning using industry best practices for medical/surgical product storage and replenishment processes.

The Transformation Initiative includes RUMC applying combinations of optimal supply chain processes and technology including Automated Guided Vehicles, Point-of-Use systems, Low-Unit-of-Measure replenishment and Exchange Carts.

According to Mike Mulroe, Associate Vice President with RUMC, "Due to the project's size and scope; we felt that we would benefit by having a qualified industry partner work with us to design our supply chain storage areas and operational processes with a focus on providing exceptional end user service and operational efficiency. We chose National Medical Logistics because of their healthcare centric experience, logistical focus, objectivity, and flexibility to work with our Transformation Team. The project will provide us with the ability to consider all of the best practice implementation concepts in the marketplace while still executing on our daily responsibilities."

About Rush Medical University Center

Rush University Medical Center is a nonprofit, academic medical center that encompasses a 613-bed hospital serving adults and children, the 61-bed Johnston R. Bowman Health Center and Rush University.

Rush University is home to one of the first medical colleges in the Midwest and one of the nation's top-ranked nursing colleges, as well as graduate programs in allied health, health systems management and biomedical research. The Medical Center also offers more than 70 highly selective residency and fellowship programs in medical and surgical specialties and subspecialties. Rush has earned national

rankings in 7 specialty areas, as reported in U.S. News & World Report's
America's Best Hospitals issue.

About National Medical Logistics

National Medical Logistics [NML] provides integrated self-distribution services including warehousing, order fulfillment, transportation services as well as supply chain consulting to medical manufacturers, distributors, providers and others in the healthcare community. With more than 70 years of experience in medical products distribution, NML helps clients improve efficiency, increase customer and employee satisfaction and reduce or control operating costs. NML is unique among advisors to this industry in that it is an unbiased and neutral entity. Because of this distinction, they can objectively evaluate the many options available to its customers, concentrating only on those solutions that provide the most value.
